DETAIL

Scaffold claw for mobile towers

2026

EDITION 2026

ALU-SCAFF S.à r.l.

Version 1.11 · As of 2026-09-25

The SCAFF mobile scaffold

SCAFF is our proven aluminium mobile scaffold for painters, facade contractors and trade businesses – lightweight, corrosion-free and assembled in minutes without special tools.

Whether SCAFF800 (0.80 m system width) or SCAFF1400 (1.40 m): both variants are available as complete systems – from the working platform to lockable castors.

This catalogue lists article numbers, technical descriptions, drawings and current net prices for the entire SCAFF range.

Your benefits at a glance

Tool-free assembly

Plug-in system with wedge connectors – fast to erect, safe in use.

Light & portable

Aluminium instead of steel: more usable area per transport, less effort on site.

Corrosion-free

No rust, low maintenance – even with permanent outdoor use.

Complete systems

800 and 1400 as ready-made sets – matching components for every working height.

Articles marked with this STEP symbol include a CAD file (STEP). You can download the file in the online shop from the article description.

How to read this catalogue

- Each product page shows the article number, name, net price, technical data and – where available – description and drawing images.
- Prices are net plus statutory VAT (17 %). Variant articles are shown as “from ... €”.
- Current availability, configuration and ordering in the online shop at <https://shop.aluscaff.lu>.

Scaffolding? Nothing easier than that!

MOBILES FAHRGERÜST – AUFSETZLEITERN / RAHMEN

002581H

Alu frame 0.50 x 0.80m

35,45 €

Prices net, plus 17 % VAT.

Technical data

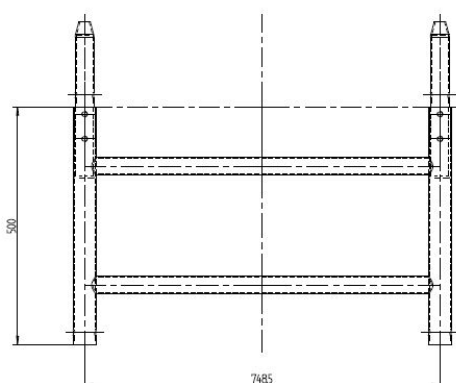

Item number	002581H
Material	Aluminium
Weight	2,5 kg
Width	0,80 m
Height	0,50 m
Surface	Self color

The **aluminium extension ladder 0.50 × 0.80 m** is the extension element for the mobile tower system **SCAFF800**. The corrosion-resistant aluminium frame is mounted tool-free onto existing frames via plug-in pins and increases the working height by 0.50 m. Weighing only 2.5 kg, assembly remains light and quick.

Advantages at a glance:

- Tool-free assembly thanks to plug-in connection
- Integrated rungs for safe ascent
- Corrosion-resistant, low-maintenance aluminium
- Low weight for easy transport

Ideal for flexibly adapting the scaffold height to the respective task – fully compatible with all **SCAFF800** components from Aluscaff.

Prices net, plus 17 % VAT.

Technical data

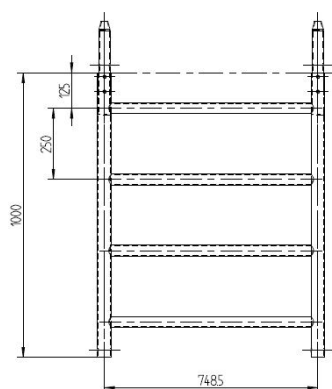

Item number	002582H
Material	Aluminium
Weight	4,75 kg
Width	0,80 m
Height	1,00 m
Surface	Self color

The **aluminium extension ladder 1.00 × 0.80 m** is the height extension element for the **SCAFF800** mobile tower system. The corrosion-resistant aluminium frame is placed tool-free onto existing frames via plug-in connectors and increases the working height by 1.00 m. At only 4.75 kg, assembly remains light and quick.

Advantages at a glance:

- Tool-free assembly thanks to plug-in connection
- Integrated rungs for safe climbing
- Corrosion-resistant, low-maintenance aluminium
- Low weight for easy transport

Ideal for flexibly adapting the scaffold height to each task – fully compatible with all **SCAFF800** components from Aluscaff.

MOBILES FAHRGERÜST – BÜHNEN / PLATTFORMEN

002586H

Platform with hatch 2.60 x 0.60m

234,86 €

Prices net, plus 17 % VAT.

Technical data

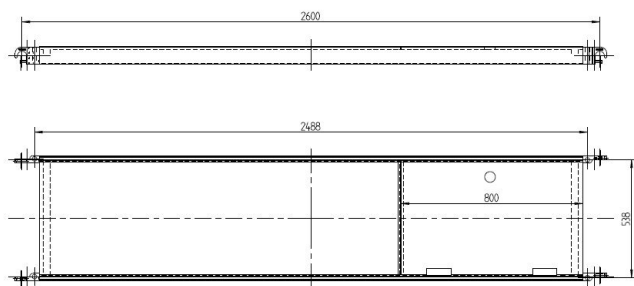

Item number	002586H
Material	Aluminium
Weight	18 kg
Length	2,60 m
Width	0,60 m
Surface	Self color

The **aluminium platform 2.6 m with trapdoor** combines safe working surface and convenient access in one component. The integrated trapdoor allows movement from level to level without having to climb the outside of the scaffold – the anti-slip deck surface ensures secure footing.

Advantages at a glance:

- Integrated trapdoor for internal access
- Anti-slip, weatherproof deck surface
- Tool-free installation via side hooks
- For SCAFF800 (one platform) and SCAFF1400 (two side by side)

Assignment is based on bay length (2.6 m), not on scaffold width: in SCAFF800, one platform is installed per level; in the wider SCAFF1400, two side by side. Recommended as access platform on every scaffold level by Aluscaff.

Technical data

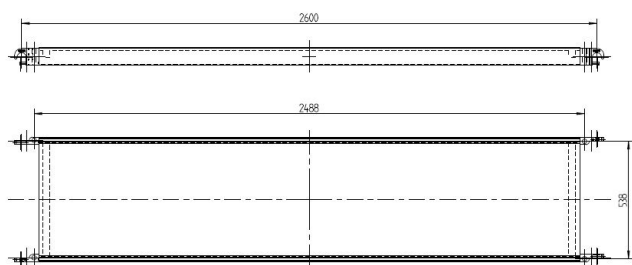

Item number	002605H
Material	Aluminium
Weight	18 kg
Length	2,60 m
Width	0,60 m
Surface	Self color

The **aluminium platform 2.6 m without hatch** is the robust working platform for the SCAFF mobile scaffold. The torsion-resistant aluminium deck with anti-slip surface is securely hooked into the frames via the side hooks and provides a level, load-bearing work surface.

Advantages at a glance:

- Anti-slip, weatherproof deck surface
- Stable aluminium construction, permanently load-bearing
- Tool-free installation via side hooks
- For SCAFF800 (one platform) and SCAFF1400 (two side by side)

Assignment is based on bay length (2.6 m), not on scaffold width: in the SCAFF800, one platform is installed per level, in the wider SCAFF1400, two side by side. The ideal deck platform for safe working at every scaffold level from Aluscaff.

Technical data

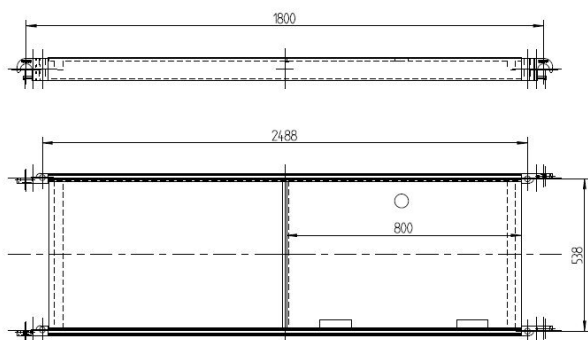

Item number	002613H
Material	Aluminium
Length	1,80 m
Width	0,60 m
Surface	Self color

The **aluminium platform 1.8 m with access trapdoor** is the compact through-access platform for confined installation situations. The integrated trapdoor allows safe climbing inside the scaffold, while the slip-resistant aluminium surface provides secure footing.

Advantages at a glance:

- Integrated access trapdoor for internal climbing
- Compact 1.8 m length for short scaffold bays
- Slip-resistant, weather-resistant deck surface
- For SCAFF800 (one platform) and SCAFF1400 (two side by side)

Assignment is based on bay length (1.8 m), not on scaffold width: in the SCAFF800, one platform is installed per level; in the wider SCAFF1400, two side by side. The ideal through-access platform for short scaffold bays from Aluscaff.

Weight	3 kg
Length	1,80 m
Width	150,00 m
Height	25,00 m
Surface	Self color
Drawing no.	3-4075-00-6-1800

The **aluminium longitudinal guardrail board 1.80 m** is part of the side protection on mobile scaffolding and prevents tools or materials from falling off the platform. The lightweight aluminium profile is attached to the frames via the end pieces without tools.

Advantages at a glance:

- Protects against falling objects
- Tool-free assembly via plug-in connectors
- Lightweight, corrosion-resistant aluminium
- Meets side protection requirements

Used in the longitudinal direction of the scaffold bay – compatible with Aluscaff SCAFF platforms.

Drawing no.	3-4075-00-6-0000

The **aluminium cross toe board 0.80 m** closes the side protection at the ends of the scaffold frame and prevents material from falling. The lightweight aluminium profile is inserted between the frames without tools.

Advantages at a glance:

- End-side protection on the scaffold
- Tool-free assembly via plug-in connectors
- Lightweight, corrosion-resistant aluminium
- Perfect fit for SCAFF800 width

Forms the complete perimeter toe board together with the longitudinal toe boards – compatible with the SCAFF800 system from Aluscaff.

Weight	2,4 kg
Length	1,40 m
Surface	Self color
Drawing no.	3-4075-00-6-0000

The **aluminium cross toe board 1.40 m** closes the side protection on the front ends of the scaffold frame and prevents material from falling. The lightweight aluminium profile is inserted between the frames without tools.

Advantages at a glance:

- Front-side protection on the scaffold
- Tool-free assembly via plug-in connectors
- Lightweight, corrosion-resistant aluminium
- Precise fit for SCAFF1400 width

Together with the longitudinal toe boards, forms the perimeter toe board guard – compatible with Aluscaff's SCAFF1400 system.

Item number	002590H
Material	Aluminium
Weight	3,2 kg
Length	2,60 m
Surface	Self color
Drawing no.	3-4075-00-1-0000

The **aluminium guardrail 2.60 m** serves as fall protection on the scaffold platform. The lightweight aluminium bar hooks tool-free into the frames with its claws and, together with knee rails and toe boards, forms the regulation-compliant edge protection.

Advantages at a glance:

- Fall protection at working level
- Tool-free hook-on installation via claws
- Lightweight, corrosion-resistant aluminium
- Quick assembly and dismantling

Essential safety component for every scaffold level – compatible with the SCAFF system from Aluscaff.

Technical data

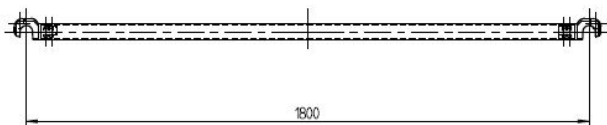

Item number	002616H
Material	Aluminium
Weight	2,2 kg
Length	1,80 m
Surface	Self color
Drawing no.	3-4075-00-1-0000

The **aluminium guardrail 1.80 m** serves as fall protection on the scaffold platform. The lightweight aluminium bar is hooked tool-free into the frames with its claws and forms, together with toe boards and mid rails, the regulation-compliant edge protection.

Advantages at a glance:

- Fall protection at the working level
- Tool-free hook-on installation via claws
- Lightweight, corrosion-resistant aluminium
- Quick assembly and disassembly

Essential safety component for every scaffold level – compatible with the SCAFF system from Aluscaff.

Technical data

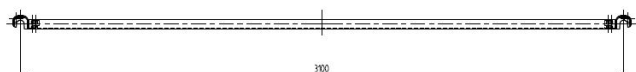

Item number	002591H
Material	Aluminium
Weight	3,6 kg
Length	3,10 m
Surface	Self color
Drawing no.	3-4075-00-1-0000

The **Aluminium V-Diagonal 3100** braces the mobile tower in the vertical plane and provides the structure with the necessary stability. The lightweight aluminium tube is secured to the frames without tools via the robust claw coupling.

Advantages at a glance:

- Vertical bracing for a stable structure
- Tool-free attachment via claw coupling
- Lightweight, corrosion-resistant aluminium
- Quick, secure connection

Essential for the stability of taller scaffolds – compatible with Aluscaff's SCAFF system.

Item number	002592H
Material	Aluminium
Weight	3,2 kg
Length	2,70 m
Surface	Self color
Drawing no.	3-4075-00-1-0001

The **Alu H-Diagonal 800** (length 2.70 m) braces the SCAFF800 mobile tower in the horizontal plane and ensures a torsion-resistant structure. The aluminium tube is attached tool-free via claw coupling.

Advantages at a glance:

- Horizontal bracing for greater stability
- Tool-free attachment via claw coupling
- Lightweight, corrosion-resistant aluminium
- Perfect fit for SCAFF800 width

Complements the V-diagonal for a stable overall structure – compatible with the SCAFF800 system from Aluscaff.

Material	Aluminium
Weight	8,3 kg
Length	2,60 m
Width	0,50 m
Surface	Self color
Drawing no.	3-4075-00-2-2600

The **Aluminium Guardrail Frame 2.60 m** combines guardrail, intermediate rail and bracing in one component and enables advanced edge protection – i.e. installation of fall protection before accessing the next level. The diagonally braced frame hooks in without tools.

Advantages at a glance:

- Advanced edge protection for safe assembly
- Guardrail and intermediate rail in one frame
- Diagonal bracing for high rigidity
- Tool-free installation, corrosion-resistant

Significantly increases safety during assembly and dismantling – compatible with the SCAFF system from Aluscaff.

The **Aluminium Guardrail Frame 1.80 m** combines guardrail, mid-rail and bracing in one component and enables advance side protection – i.e. installing fall protection before accessing the next level. The diagonally braced frame is hooked in without tools.

Advantages at a glance:

- Advance side protection for safe assembly
- Guardrail and mid-rail in one frame
- Diagonal bracing for high rigidity
- Tool-free installation, corrosion-resistant

Noticeably increases safety during assembly and dismantling – compatible with Aluscaff's SCAFF system.

Weight	28 kg
Length	1,80 m
Surface	Self color

The **mobile beam 1.80 m** forms the mobile base of the SCAFF scaffold. It accommodates the castors, increases the support surface and thus ensures a tip-safe, stable construction. The plug-in connectors join it to the frames without tools.

Advantages at a glance:

- Increases the base area for greater tip safety
- Accommodates the castors of the mobile scaffold
- Tool-free plug-in connection to the frames
- Robust, corrosion-resistant aluminium

Essential requirement for a safe, mobile scaffold – compatible with the SCAFF system from Aluscaff.

The **telescopic arm** is the length-adjustable support for lateral widening of the mobile tower. Extended and secured with a locking pin, it enlarges the base area and increases stability – especially at greater assembly heights.

Advantages at a glance:

- Infinitely length-adjustable to widen the base
- Increases tipping safety at great heights
- Quick fixing with locking pin
- Robust, corrosion-resistant aluminium

Essential stabilising element for tall scaffolds – compatible with the SCAFF system from Aluscaff.

The **triangular outrigger 3.10 m** widens the base of the mobile tower diagonally outwards and reliably supports tall structures. The triangular construction is attached securely and without tools to the frame via claw couplings.

Advantages at a glance:

- Diagonal support for high stability
- Robust triangular construction made of aluminium
- Tool-free attachment via claw couplings
- Extends the permissible assembly height

Recommended stabilisation for large working heights – compatible with the SCAFF system from Aluscaff.

The **scaffold castor 7.5 kN** with 200 mm diameter is the ideal swivel castor for heavy-duty aluminium mobile towers, designed for a load capacity of up to 7.5 kN. The white polyamide wheel runs smoothly and protects sensitive floors indoors.

Benefits at a glance:

- Double brake lever locks both wheel and swivel plate simultaneously
- Floor-protecting polyamide wheel (Ø 200 mm)
- Plug-in stem for tool-free assembly
- Tested to EN 1004

Reliable accessory and spare part for Aluscaff mobile aluminium scaffolds.

SCAFF800 – Working height 7.70 m

2.952,41 €

Prices net, plus 17 % VAT.

Technical data

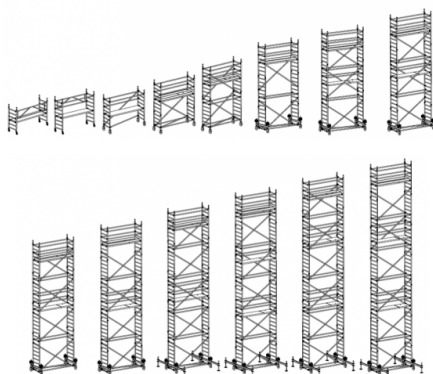

Item number	002848H
Material	Aluminium
Weight	203 kg
Working height	7,70 m

The **SCAFF800 aluminium mobile scaffold** with **7.70 m working height** is a complete, mobile scaffolding system for indoor and outdoor work. The narrow 0.80 m frame with 0.60 m platform fits through standard doors and into tight spaces; assembly is tool-free by simply clicking the components together.

Advantages at a glance:

- Complete set with frames, platforms, guardrails and mobile beams
- 0.80 m system / 0.60 m platform width, 7.70 m working height
- Swivel castors with locking brake for secure stability
- Total weight approx. 203 kg

Ideal for façade, painting and installation work at medium heights. Lightweight, durable and corrosion-resistant – the SCAFF800 system from Aluscaff.

Scaffolding? Nothing easier than that!

MOBILES FAHRGERÜST – KOMPLETTSYSTEME

002861H

SCAFF1400 – Working height 8.50 m

3.730,58 €

Prices net, plus 17 % VAT.

Technical data

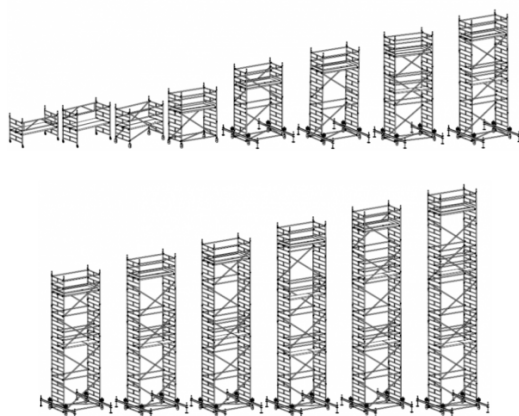

Item number	002861H
Material	Aluminium
Weight	327 kg
Working height	8,50 m

The **SCAFF1400 aluminium mobile scaffold** with **8.50 m working height** is a complete, mobile scaffolding system for indoor and outdoor work. The 1.40 m system width with 0.60 m platform offers particularly generous working and storage space; assembly is tool-free through simple plug-in connection of components.

Advantages at a glance:

- Complete set with frames, platforms, guardrails and travelling beams
- 1.40 m system / 0.60 m platform width, 8.50 m working height
- Swivel castors with locking brake for secure positioning
- Total weight approx. 327 kg

Ideal for façade, painting and installation work at medium heights. Lightweight, durable and corrosion-resistant – the SCAFF1400 system from Aluscaff.

Scaffolding? Nothing easier than that!

SCAFF1400 – Working height 9.50 m

4.126,32 €

Prices net, plus 17 % VAT.

Technical data

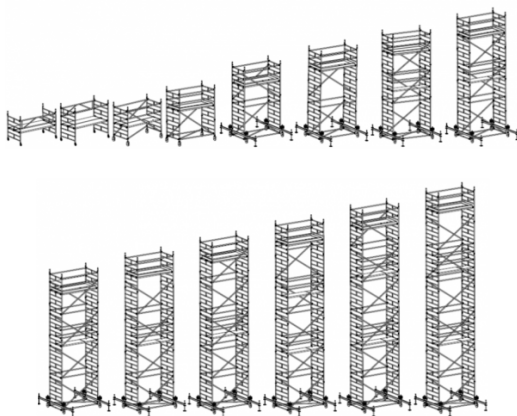

Item number	002862H
Material	Aluminium
Weight	350 kg
Working height	9,50 m

The **SCAFF1400 aluminium mobile tower** with **9.50 m working height** is a complete mobile scaffolding system for indoor and outdoor work. The 1.40 m system width with 0.60 m platform provides exceptionally generous working and storage space; assembly is tool-free through simple plug-in connection of components.

Advantages at a glance:

- Complete set with frames, platforms, guardrails and wheel beams
- 1.40 m system / 0.60 m platform width, 9.50 m working height
- Swivel castors with parking brake for secure stability
- Total weight approx. 350 kg

Designed for high working heights on façades, halls and industrial applications. Lightweight, durable and corrosion-resistant – the SCAFF1400 system from Aluscaff.

Scaffolding? Nothing easier than that!

SCAFF1400 – Working height 10.50 m

4.297,62 €

Prices net, plus 17 % VAT.

Technical data

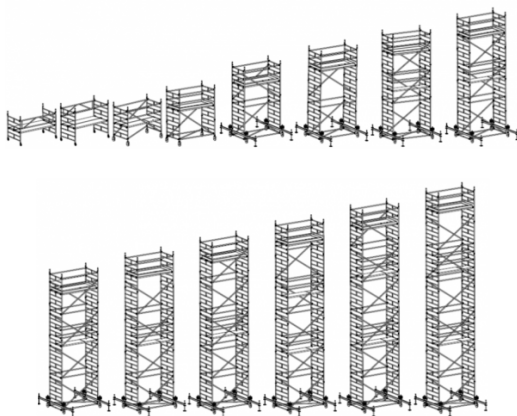

Item number	002863H
Material	Aluminium
Weight	363 kg
Working height	10,50 m

The **SCAFF1400 aluminium mobile tower** with **10.50 m working height** is a complete mobile scaffolding system for indoor and outdoor work. The 1.40 m system width with 0.60 m platform offers particularly generous movement and storage space; assembly is tool-free by simply connecting the components.

Advantages at a glance:

- Complete set with frames, decks, guardrails and wheel beams
- 1.40 m system / 0.60 m platform width, 10.50 m working height
- Swivel castors with locking brake for secure positioning
- Total weight approx. 363 kg

Designed for high working heights on façades, halls and industrial applications. Lightweight, durable and corrosion-resistant – the SCAFF1400 system from Aluscaff.

Scaffolding? Nothing easier than that!

SCAFF800 – Working height 10.70 m

3.551,67 €

Prices net, plus 17 % VAT.

Technical data

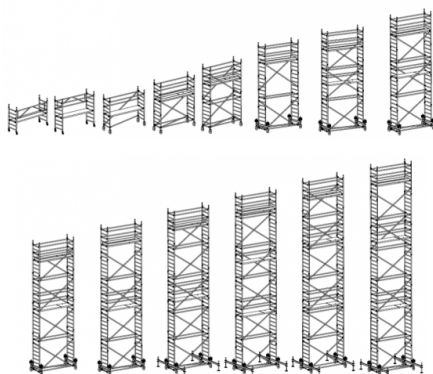

Item number	002851H
Material	Aluminium
Weight	279 kg
Working height	10,70 m

The **SCAFF800 aluminium mobile scaffold** with **10.70 m working height** is a complete, mobile scaffolding system for indoor and outdoor work. The narrow 0.80 m frame with 0.60 m platform fits through standard doors and into tight spaces; assembly is tool-free by simply slotting the components together.

Benefits at a glance:

- Complete set with frames, platforms, guardrails and wheel beams
- 0.80 m system / 0.60 m platform width, 10.70 m working height
- Swivel castors with locking brake for secure stability
- Total weight approx. 279 kg

Designed for high working heights on façades, halls and industrial applications. Lightweight, durable and corrosion-resistant – the SCAFF800 system from Aluscaff.

Scaffolding? Nothing easier than that!

SCAFF1400 – Working height 11.50 m

4.874,80 €

Prices net, plus 17 % VAT.

Technical data

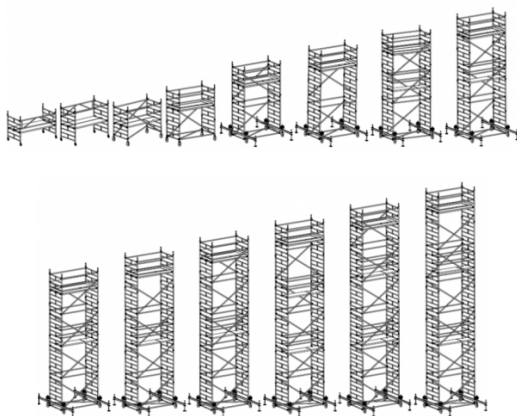

Item number	002864H
Material	Aluminium
Weight	383 kg
Working height	11,50 m

The **SCAFF1400 aluminium mobile tower** with **11.50 m working height** is a complete mobile scaffolding system for indoor and outdoor work. The 1.40 m system width with 0.60 m platform offers particularly generous working and storage space; assembly is tool-free through simple plug-in connection of components.

Advantages at a glance:

- Complete set with frames, platforms, guardrails and wheel beams
- 1.40 m system / 0.60 m platform width, 11.50 m working height
- Swivel castors with locking brake for secure positioning
- Total weight approx. 383 kg

Designed for high working heights on façades, halls and industrial applications. Lightweight, durable and corrosion-resistant – the SCAFF1400 system from Aluscaff.

SCAFF800 – Working height 11.70 m

4.258,83 €

Prices net, plus 17 % VAT.

Technical data

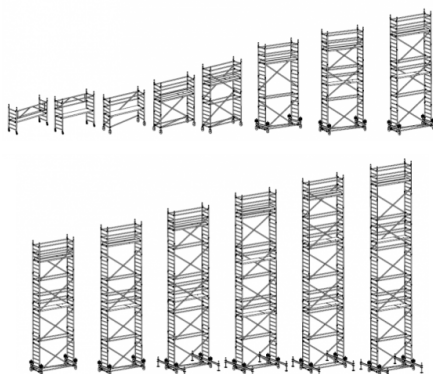

Item number	002852H
Material	Aluminium
Weight	288 kg
Working height	11,70 m

The **aluminium mobile tower SCAFF800** with **11.70 m working height** is a complete, mobile scaffold system for indoor and outdoor work. The narrow 0.80 m frame with 0.60 m platform fits through standard doors and into tight spaces; assembly is tool-free by simply clicking the components together.

Benefits at a glance:

- Complete set with frames, platforms, guardrails and wheel beams
- 0.80 m system / 0.60 m platform width, 11.70 m working height
- Swivel castors with locking brake for secure standing
- Total weight approx. 288 kg

Designed for high working heights on façades, halls and industrial applications. Lightweight, durable and corrosion-resistant – the SCAFF800 system from Aluscaff.

Scaffolding? Nothing easier than that!
